

question-8

June 6, 2023

Question 8 -

Using the data from Question 5, write code to analyze the data and answer the following questions
Note -

1. Draw plots to demonstrate the analysis for the following questions and better visualizations
2. Write code comments wherever required for code understanding

Insights to be drawn -

Get all the overall ratings for each season and using plots compare the ratings for all the seasons, like season 1 ratings, season 2, and so on.

Get all the episode names, whose average rating is more than 8 for every season

Get all the episode names that aired before May 2019

Get the episode name from each season with the highest and lowest rating

Get the summary for the most popular (ratings) episode in every season

Ans:

```
[1]: import numpy as np
import pandas as pd
import ast
```

```
[2]: df = pd.read_csv("Output.csv")
```

```
[3]: df.head()
```

```
